

FlameOut!™

The Ultimate Fire Suppressor for Professionals

The exciting versatility of this technology means that a safer workplace, home, and environment is at hand.

Product Availability

FlameOut™ suppressant is available in a variety of industrial packaging including 5, 15, and 55 gallon containers and can also be supplied in bulk by tank truck and rail car. Consult your BioGenesis representative for delivery information and pricing.

Product Capabilities

FlameOut™ suppressant is an extremely effective fire suppressing agent for use on Class A, B, and D fires. This new generation chemical replaces foams, halon, and other conventional chemicals. It is safe for firemen, victims, and the environment. Tested by professional firefighters, the chemical has earned EPA listing and is currently undergoing testing for UL approval.

Over 16 years of company research and development has produced a fire suppressant that is superior to existing fire fighting technologies because:

- ☒ FlameOut™ cools burning material rapidly.
- ☒ FlameOut™ consumes the oxygen that feeds the fire.
- ☒ FlameOut™ penetrates deeply to prevent reflash.
- ☒ FlameOut™ acts as a retardant by keeping treated materials from burning.
- ☒ FlameOut™ is non-corrosive and non-toxic.
- ☒ FlameOut™ is safe to store, handle, and use.
- ☒ FlameOut™ is up to 6 times more effective than water alone, and greatly reduces water consumption.
- ☒ FlameOut™ is environmentally safe and 100% biodegradable.
